

If an undamaged pecan half was worth \$1.00, a pecan piece was worth \$0.50, and a broken pecan piece was worth \$0.25, and you had 5 undamaged pecan halves, 10 pecan pieces and 20 broken pecan pieces how much money would you have?

$$\underline{\$1.00} \times \underline{5} = \$ \underline{5.00}$$

$$\underline{\$0.50} \times \underline{10} = \$ \underline{5.00}$$

$$\underline{\$0.25} \times \underline{20} = \$ \underline{5.00}$$

$$\text{Total } \$ \underline{15.00}$$
